

## Project Design Phase-I Solution Architecture

Date	11 October 2022
Team ID	PNT2022TMID01023
Project Name	IoT Based safety gadget for child safety monitoring & notification
Maximum Marks	4 Marks

### Solution Architecture:

The idea behind this project is to provide data help the parents in continuously monitoring the child's location. They can simply leave their children in school or parks and create a geofence around the particular location. By continuously checking the child's location notifications will be generated if the child crosses the geofence. Notifications will be sent according to the child's location to their parents or caretakers. The entire location will be stored in the database..
